

LEPR: short vs long · 2 cohorts, control donors

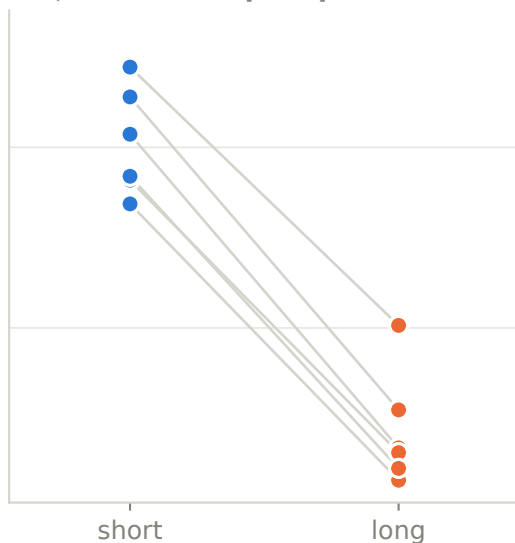

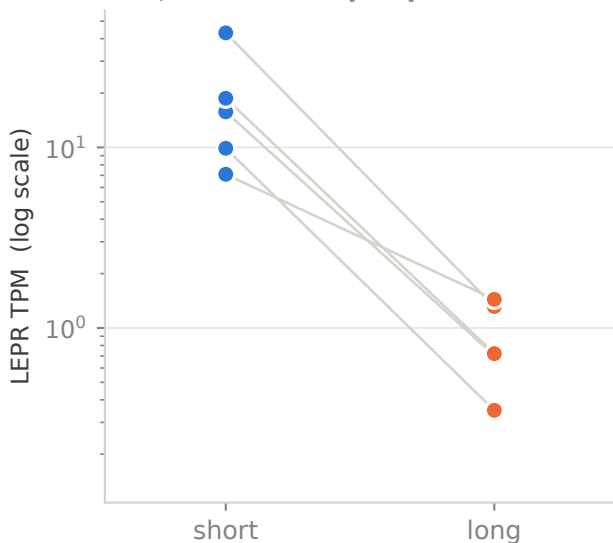

combined n = 11, 11/11 concordant · Stouffer P = 0.00442

GSE228458 (control, n = 5)

GSE137619 (control, n = 6)

5/5 donors · 26x [5-33] · P = 0.0625

6/6 donors · 38x [30-54] · P = 0.0312

the exact test cannot go below P = 0.0625 at n = 5

also: stratified signed-rank P = 0.00279 · donor-pooled P = 0.000977
